

PC-76 Fence Stage

- Fence stage; It consists of 7 pieces of Ø114 mm SDM pipes (2 pieces of Ø114 mm pipe on the sheet metal part with foot elevation), 1 piece of semi-circular platform, 6 pieces of bugs bunny fence board and 7 pieces of figures.
- The platform is made of perforated sheet with minimum dimensions of 528 cm x 377 cm x 8 cm and minimum wall thickness of 1.5 mm-2 mm.
- The surface designed as flat to prevent slipping and not to allow water retention.
- In the middle of the platform, in order to prevent the sheet from flexing, support sheets are welded to the lower part.
- The corners of the platform are made in the form of a quarter circle that wraps the Ø114 mm pipe.
- The sheets are washed with special chemicals before the coating process and cleaned from oil and dirt that will prevent the coating on them and then coated with priming method.
- After the priming process, the upper surface of the platform is hot-dip method with an anti-static material mixture with a hardness of -60 ± 5 share A, a density of 1 gr/c m³, minimum kgf/cm² breaking strength, 650-700% breaking elongation, and 100 m³ (max) abrasion. PVC (Plastisol) coating is made.
- PVC thickness is produced at a minimum of 2 mm at each point.
- Bugs Bunny Fence panels are manufactured from self-colored polyethylene LLDPE (Linear Low Density Polyethylene) material with double walls by rotation molding method.
- Bugs Bunny Fence panels will be fixed to each other with the help of POLYEMIDE-based clamp system with pipes with a diameter of Ø114 mm with dimensions of 93x118 cm.
- The dyes used in coloring will be suitable for children's health.
- The figures are used to add visuals to the game groups.
- It is resistant to UV lights and designed in such a way that it does not harm the user.

Dimensions	Platform Length	528 cm
	Platform Diameter	377 cm
	Height	248 cm
	Stage Foot Height	20 cm
