

PR-22

- Rope climbing game group; Ø 16 diameter polyester yarn braided steel rope min. it is produced with 4 mm wall thickness Ø 140 SDM pipe to form a climbing system with connection to the ground and tension elements.
- The pipes are baked in a 200°C oven for 20 minutes by using a polyester-based electrostatic powder coating process.
- Each rope consists of 6 coils of steel rope, the middle of which consists of 7 steel threads made of polyamide raw material fiber.
- Steel cored rope consists of a total of 42 reinforced steel ropes.
- It does not contain toxic substances in its contents and paint.
- The outside of the rope is knitted with polyamide ropes.
- Steel wires are manufactured in such a way that they remain in the center of the polyamide ropes so as not to contact the user.
- The installation of the game group on the ground is made with the main pole and 4 pieces of side rope arm tools.
- The main pipe is installed on the floor with flange.
- The connection points of the steel ropes with the concrete floor are made with laser-cut platinum.
- The ground height of the playgroup is 435 cm.
